About Pioneers

At **Pioneer Panels**, we are redefining the possibilities of architectural design with our premium range of **Metal Composite Panels (MCP)** and innovative surface solutions. With years of expertise, state-of-the-art technology, and a commitment to excellence, we have become one of the most trusted names in the industry.

Founded in 2018, Pioneer Panels is the result of a vision shared by experienced industrialists in manufacturing, product development, quality control, distribution, and sales of Metal Composite Panels (MCPs). Our brand has become synonymous with superior quality and trust among architects, façade specialists, interior designers, contractors, and end users of MCP.

Our state-of-the-art manufacturing facility which is **spread across 11,635 sq. mt.** is equipped with advanced machineries and automated processes, enabling us to deliver panels with exceptional precision, durability, and consistency. With a **high production capacity of 3 million sq. mt. p.a.**, we ensure reliable supply to meet the demands of large-scale projects across India and beyond.

Quality is at the core of everything we do. Our in-house laboratory conducts rigorous testing ensuring that every panel complies with national and international standards. We proudly adhere to various **BIS, ISO, ASTM, and EN** benchmarks, offering our customers products that are safe, sustainable, and performance-driven.

Pioneer Panels – Where Innovation Meets Reliability

Magma Metal Series

Each shade in this collection is engineered not just for visual appeal but for lasting performance in real-world conditions. These panels resist time, weather, and trends—allowing architects to build with confidence and creative freedom..

SETS **B1**
FIRE RETARDANT ACP'S

American Acceptance Criteria

Fire Behaviour	Criteria
Overall	NFPA 285
Vertical Flame Spread	Not more than 10 ft
Horizontal Flame Spread	Not more than 05 ft
Flame on Second Floor	No Flame
Flame spread between intersection and side wall	No spread
Other Temperature Related Criteria	Less than 1000 degrees Fahrenheit
The overall test is for conducted for 30 mins followed by 10 min observation period	

British Fire Standards

Fire Behaviour	Standard	Criteria
Overall	BS 476	Class 0
Fire propagation index (1)	Part 6	Overall 1<6
Fire Spread on Surface	Part 7	< 165 mm for class 1
In Part 7, the product is evaluated for delamination and melting during flame spread testing. If the product exhibits any of these behaviors, a "Y" is added to the classification, indicating that these characteristics were observed.		

European Union Acceptance Criteria

Fire Behaviour	Standard	Criteria
Overall	EN 13501-1	Class B, S1, do
Flame Spread	EN 11925-2	Flame Height in 60s < 150mm
Flaming Droplets	EN 11925 - 2 & EN 13823	None
Fire Growth Rate	EN 13823 - s1	FIGRA ≤ 120 W/s
Total Heat Release in 1st 600 Secs		THR600s ≤ 7.5 MJ
Smoke Growth Rate		SMOGR ≤ 30 m2/s2
Lateral Flame Spread		LFS < edge of the specimen
Total Smoke Produced in 1st 600 Secs		TSP600s ≤ 50 m2

PIONEER FORBID FIRE PANELS has been developed exclusively for more stringent fire prevention regulations in architectural products, the use of fire retardant panels is appropriate where the specifications of building codes and public safety require compliance with fire safety. this standard is particularly sought after for commercial user such as restaurants, schools, hospitals, hotels, shopping centers, airports, offices and other public buildings.
