Metal Composite Panel

PIONEERING METAL COMPOSITE PANELS IN INDIA

For over two decades, Aludecor has led India's architectural transformation with innovation, quality, and sustainability. The country's first aluminium coil coater and winner of the European Aluminium Award by ESQR, we offer unmatched production capacity with multiple advanced lamination lines and India's only FR granule pelletising line. Trusted by architects nationwide, our solutions - including the versatile Shade Collection with finishes from Gloz, Brushed, and contemporary tones in AL-43, AL-33, AL-32, and AL-312 - have embellished over 2 lakh projects, delivering aesthetics, durability, and design freedom.

- ◆ 1st ACP manufacturer with NABL-accredited R&D FR Lab (as per ISO/IEC 17025:2017)
- ◆ Only company in India to have a pelletising line for manufacturing FR granules
- ◆ Over 23 years of championing the metal composite panel industry in India
- ◆ Available in over 250 cities across India & select international presence
- ◆ Over 10.08 million square metres annual production capacity
- ◆ 500+ shades, personalised to fit your world
- ◆ Over 2 lac projects beautified in India
- ◆ 7 state-of-the-art lamination lines
- ◆ 1st Aluminium Coil Coaters in India

CHOOSING THE RIGHT ACP: For Your Reputation Matters!

PRESERVE BEAUTY WITH QUALITY PAINT AND COATING

Application	Coating Type	Micron Details	Impact
Exterior (High-Rise)	PVDF (as per AAMA 2605)	25 microns	Long-Term Fade Resistance
Exterior (Mid/Low-Rise)	SDP (Super Durable Polyester)	25 microns	Colour Vibrancy + Gloss Retention
Interior Use Only	Polyester	15 - 17 microns	Fades Outdoors

Pro Tip: Look for 70:30 resin ratio in PVDF (e.g. Kynar 500) that ensures better chalking resistance, gloss retention, and flexibility.

CHOOSING THE RIGHT ALLOY

Alloy Series	Application	Coil Type	Impact
1100	Exterior/Interior (Mid/Low-Rise)	DC (Direct Chilled) fully compressed	Superior bending, no cracking, better formability
3105/5005	Exterior (High-Rise)	DC (Direct Chilled) fully compressed	Superior bending, no cracking, better formability

Pro Tip: Continuous Cast coils if used may lead to cracking of Aluminium sheet during fabrication. Incorrect alloy selection may increase stress and deflection on panel which may lead to deformation, delamination, undulation or even structural failure.

ENSURE IMPECCABLE FLATNESS

All-steel roller technology ensures flat ACPs and minimized bow.

FIRE SAFETY – A RESPONSIBILITY WORTH EMBRACING

Fire Retardant Grade	Standard	Use Case
B1	DIN 4102	Shop boards & low-risk applications
B	EN 13501-1 Class B-s1, d0	Exterior façades of buildings below 5 floors
A2	EN 13501-1 Class A2 s1, d0	High-footfall areas like govt buildings, hospitals, airports, etc.

Pro Tip: Always verify if the material is from a Factory Production Control (FPC) certified unit with a valid Certificate of Confirmation of Fire Performance (CoC).

CLEANING AND MAINTENANCE

Routine Cleaning:

- Clean every year with mild detergent and soft cloth.
- Rinse with clean water; avoid abrasive cleaners.
- Try using ventilated facade system like Aludecor MFR to decrease the cleaning efforts.

Special Conditions:

- Coastal areas: More frequent cleaning to prevent salt buildup.
- High pollution zones: Half-yearly cleaning recommended.

WHY ALUDECOR?

- India's first Aluminium roller coil coater, using **direct chill coils** and an **all-steel roll line** for exceptional flatness and durability.
- Global-standard paint systems with PVDF/SDP coats for longer gloss retention, easier cleaning and higher project value.
- In-house fire-retardant pelletizing, NABL-accredited fire lab, and FPC-certified unit with CoC compliance.
- Over 205 quality tests – the most in the industry, ensuring consistency, safety, and performance.
